To whom it may concern

You requested a letter of recommendation for Kanishq Sahu for his internship program application at your esteemed organization. I have been acquainted with Kanishq Sahu since December 2023, when he enrolled in my course, "Fluid Mechanics (CH204)," and initiated a research project under my supervision. It gives me great satisfaction to endorse Kanishq Sahu for consideration in your internship program.

Kanishq is currently pursuing a Bachelor of Technology degree at the Indian Institute of Technology (IIT), Ropar, with a major in chemical engineering. His admission to this prestigious institution, achieved through a highly competitive entrance examination where he ranked among the top 1.5% of students, is a notable accomplishment. Kanishq continues to excel in his academic pursuits at IIT.

Demonstrating exceptional talent, intelligence, diligence, and discipline, Kanishq consistently exhibits clear and articulate communication of his thoughts and inquiries during class. Throughout my "Fluid Mechanics" course, he consistently stood out among his peers. What particularly impressed me about Kanishq is his outstanding ability to work independently. His analytical skills and curiosity place him among the top 5% of all students I have encountered. In terms of research capabilities, Kanishq has exceeded my expectations in his involvement in a challenging project titled "Rheological study on granular materials sheared by a rotating blade." Despite the intricacies of the subject matter, he immersed himself in the research, working efficiently with enthusiasm and energy.

In conclusion, I wholeheartedly recommend Kanishq without any reservations for his application to your internship program. Please feel free to contact me if you require any further information or input.

Sincerely Yours,

Saikat Roy
